December 2022

Safe tuning beyond standard production

With the Police BMW i4 by AC Schnitzer as a concept car, the Aachen-based tuning company has played a major role in the initiative TUNE IT! SAFE! 2022/2023

Faster than the police allow - that of course applies to the concept vehicles of the TUNE IT! SAFE! initiative as much as any other vehicle!

Because every year for the past 17 years, a vehicle in the original police design has been presented that complies with the traffic safety regulations of the law enforcers. The campaign, which is supported by the Federal Ministry of Transport and Digital Infrastructure Germany, uses the nationwide campaign to draw attention to safe tuning and to show what is possible in tuning when the road traffic licensing regulations are complied with. The campaign is of course financed exclusively by sponsors.

For the eighth time, Aachen-based tuning company AC Schnitzer is playing a major role in the showcase for safe tuning. The all-electric BMW i4 by AC Schnitzer fulfils all the requirements for a dynamic, powerful and sporty appearance while at the same time complying with regulations and taking sustainability aspects into account. The fact that AC Schnitzer is also a competent partner for increasing driving dynamics and fun with electric vehicles is not only shown by the now extensive programs for hybrid and electric vehicles. The Aachen-based tuners were able to gain their first experience with an electric vehicle 12 years ago, when the TUNE IT! SAFE! vehicle, the Electric Police MINI, was equipped by AC Schnitzer.

The aerodynamics package from AC Schnitzer already makes the heart of every tuning fan beat faster and the downforce values increase: Front spoiler elements, front splitter, front side wings, the AC Schnitzer design package side (2 elements per side), rear roof spoiler, carbon rear spoiler, rear side wings and, to complete the look, the AC Schnitzer rear skirt protection film bring motorsport feeling closer to the road.

Thanks to the AC Schnitzer suspension spring kit (lowering: front / rear: approx. 20 - 25 mm each compared with the standard suspension), this is not far from the driver and ensures optimum road and cornering stability.

The AC Schnitzer wheel set with AC4 Flow Forming rims BiColor Silver/Black (front: 8.5J x 20" with Hankook Ventus S1 evo 3 tyres in 255/35 R 20 and rear: 9.5J x 20" with in 265/35 R 20) stands for technically modern design just like the interior of the concept car.

AC Schnitzer aluminium pedals, aluminium footrest, aluminium cover "Black Line" for i-Drive System Controller and aluminium keyholder pass not only every police check but also every design check.

The BMW i4 by AC Schnitzer was fitted with the Police special signalling system by Hella. The official FOLIATEC foil decor and the SECURLUX safety foil in the side windows complete the original Police outfit.

Homologation approval of AC Schnitzer special parts for road traffic is a central topic in the development of new components. All the components used in the TUNE IT! SAFE! Police BMW i4 by AC Schnitzer are tested accordingly. This means that the current concept vehicle of the TUNE IT! SAFE! initiative is on this side of all road approval regulations, but - as usual with AC Schnitzer - beyond any standard production!
