August 2022

### Emission and compromise-free The i4 by AC Schnitzer also electrifies beyond the standard

Elegant, dynamic and emission-free - this is probably the best way to describe the BMW i4. After a visit to the workshop of the tuning specialists at AC Schnitzer, further adjectives are now added: sporty, tailor-made and individual!

The petrol engine and exhaust system of the electric vehicle do not allow any tuning, as they are simply not present. But that in no way stopped the tuning specialists at AC Schnitzer from developing a range for the BMW i4 that nevertheless brings that motorsport feeling to the road.

The AC Schnitzer spring kits, each lowered by approx. 20 - 25 mm at the front / rear compared to the standard suspension, ensure even greater agility and precision in handling due to the lower vehicle centre of gravity.

Power is transmitted directly to the wheel sets, for which AC Schnitzer offers the usual wide choice. AC4 Flow Forming wheels in BiColor Silver/Black or Black (front: 8.5J x 20" with 255/35 R 20 tyres; rear: 9.5J x 20" with 265/35 R 20 tyres) or AC1 BiColor Silver/Anthracite or Anthracite alloy wheels in 19 or 20 inch are available.

The wheel spacers (black anodised aluminium) offered for the front and rear axles for the continued use of the standard rims position the wheels 10 mm further out on each side. This makes the selected standard rims for the BMW i4 stand out even more. The vehicle looks sportier overall and the lateral support is improved.

The Aachen tuning specialists have also come up with some ideas for the BMW i4 in terms of aerodynamics: AC Schnitzer front spoiler elements, front splitter (for vehicles with AC Schnitzer front spoiler elements) or front splitters for vehicles without AC Schnitzer front spoiler elements and front side wings significantly improve the handling characteristics and ensure optimum driving values through increased downforce.

For even more driving stability and dynamics at the rear, the AC Schnitzer rear roof spoiler, carbon rear spoiler and rear side wings can be used. Visually, the AC Schnitzer design package for the side (2 elements per side), the rear skirt protection film and the AC Schnitzer stickers (left and right) show that the driver of the i4 equipped in this way has not been satisfied with the standard equipment.

After a visit to the tuning workshop, driver and passenger can also look forward to an exceptional interior: AC Schnitzer aluminium pedals, aluminium footrest, aluminium cover "Black Line" for i-Drive System Controller and aluminium keyholder meet the highest demands on design and functionality.

Elegant, dynamic, (motor-)sporty, tailor-made as well as emission- AND individual -.  
The i4 by AC Schnitzer electrifies BMW fans beyond the series!
